

**WEBB
ELECTRONICS**

Your Solution for Sports Video Since 1986

Baseball Camera Mounting Options

Webb Electronics Mounting Options offers you the capability to place cameras in key locations, providing optimal coverage of action on the field.

Our flexible system can be installed on top of the 1st or 3rd base dugouts for a perfect view of home plate, mounted on the outfield fences or baseline for a wide-angle view or located behind home plate providing you a technical birds-eye look of the infield.

Combined with *Webb Electronics Air Potato* ability to control start/stop of multiple cameras, you will have the means to review each play from different perspectives on the field while cutting out unwanted video footage between plays.

Ball Mount Option

Ball Mounting Samples

Min. 0.25" - Max. 6.75" Attachment Capability

*Extension pole ordered separately or purchased by customer. (Part# - ExtPole48)

"The biggest benefit is the instantaneous feedback from what we see during practice from different angles. I get to slow it down as much as I like to watch quality at bat. I show it to the kids and they get to see what they are doing right and wrong."

- Coach Travis Yoder Highland, Park High School, TX
