

RoverCam GP18 Telescoping Camera System *includes Hand Held Air Potato*

The RoverCam GP18 is designed to video record in gyms and other indoor venues with a space-conscious tripod base that easily fits along the baseline. It comes with our Hand Held Air Potato System which allows you to synchronize the start/stop recording of 1 - 8 cameras. Video is automatically clipped saving you valuable time by eliminating the need to match video, recording only the action you want.

Systems includes:

- Hand Held Air Potato
- HD Camera
- Head Plate for protection of camera and tripod head

- Get a perfect view of action on the court
- Tripod setup 3 ft behind baseline
- Great for recording games and practice
- Save time by automatically synchronize recording of cameras from different angles
- Control cameras from the bench with one person
- Simple setup and take down
- Easily integrates with Hudl and other online systems
- Review plays from different angles. Show the serve from both the baseline and from the side
