

# Travel RoverCam 20 Telescoping Camera System

The Travel RoverCam 20 telescoping camera system is designed for portability and easy setup that fits into the trunk of most cars.

## Travel Rover

## Features & Benefits

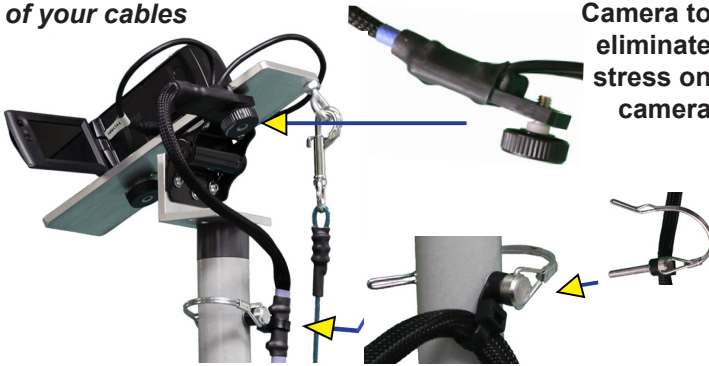

- Simple setup and take down (5 - 6 minutes).
- Collapsed height of 56 inches makes it easy to transport in most cars, SUVs and pickups.
- Optional wheeled carrying bag makes it easy to transport from your vehicle to the field.
- Tripod base is wider than any portable system in its class for stability.
- One long life Lithium battery powers both the camcorder and the monitor eliminating the need for multiple batteries.
- Industrial style cable connectors help prevent damage to the cable.
- Field replaceable cable top keeps the system up and running.
- Industrial strain relief protects cable connectors.
- Mast is made of heavy duty Aluminum with Fiberglass outer shell for protection
- Dual purpose - Can be used with the tripod base or as a monopod.
- Comes in 3 series (Economy, Standard & Elite) to fit your budget.
- Coaches Video has been providing sports teams with video equipment for more than 33 years.

## Industrial Cable Strain Reliefs

All Rovers come with the best strain relief in the market to protect the ends of your cables

Cables move with Camera to eliminate stress on camera

Cable assembly is attached firmly to the tilt head and uses the pin that secures the tilt head to the pole.  
(No Velcro used)

## Optional 3 piece Rover Rain Cover

### Camcorder Cover

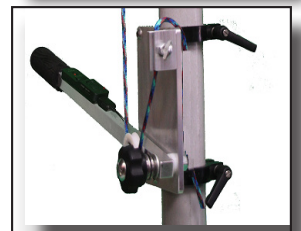

## Optional Rover Travel Bag for Tripod and Mast

## Manual Tilt

For Better  
Control  
and  
Rugged  
Design

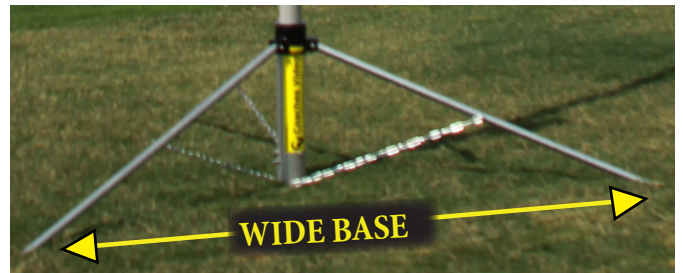

Manual tilt allows for a very responsive tilt and will not miss any of the action compared to electric tilt unit

## Travel Bag comes with wheels

## Stable Extra Wide Base

(Weight centered on ends of legs for stability)
